Redford, MI 48239

Dear Amber,

I am writing to formally acknowledge Classic Plating, Inc. for the superb job it has done with our plating requirements. As you know, we manufacture and sell our products Worldwide to the Food and Beverage Industry and have struggled to find the right type of plating process in our difficult application. Your technicians recommended the Electroless Nickel/Tri-Chrome plating for our application and we have seen a significant increase in the life of our parts since switching to it. Your company has shown us high quality standards on your plating and excellent customer service. We would highly recommend your company to anyone looking for En/Tri-Chrome plating. We look forward to growing our business with Classic Plating, Inc.

Sincerely,

Melissa Bottke
Sales & Marketing Manager
